As the coordinator of Department of Botany, it gives me great satisfaction to present the newsletter of the department. One can clearly note the wide spectrum of articles, poems and art in different sections, it shows creative potential and original thinking of students of Department of Botany and it's alumni. Commendable job has also been done by the editorial board in planning and production of the newsletter. My congratulations to the whole team.

I am sure that publishing a newsletter containing the achievements of current students and alumni will be a recognition to them, develop the taste of reading, develop a sense of belonging to the institution as well. I wish them all the very best for future endeavors.

BUDS AND BLOSSOMS

I couldn't sleep at night

Oh my mom ,
hear me ,I am the sound of your lullaby..
I am the visible note of your invisible music..
The eternity of silence sundered and wondering for u..
As ,she is heedless about your serenity..
MOM,
your lullaby made me to ;
Follow your footsteps like an anklet to your feet..
MOM, your berceuse made me
learn like an infant .
But Mom,if I have to
mislay the fear you have to appear
because if u are there ,then I exist...
As I am a part of your form..

I have learned that no matter what happens, or how bad it seems, life goes on, and it will be better tomorrow. I've learned that you can tell a lot about a person by the way he /the handles - a lost luggage , a rainy day and also a tangled earphones . I've learned that making a "living" is not the same thing as making a "life". I've learned that sometimes life gives you a second chance . I've learned that everyday you should reach out & touch people , because they love warm hugs, or a fondly pat on the back . I've learned that people will forget what you said, people will also forget what you did , but people will never forget how you made them feel .

From having it all alone
To sharing it with others
From crying for attention
To living life alone
From showing body scars
To hiding the pain of broken heart
From getting all things u want
To loosing people close to you
From come out and play
To come online and chat
From just give me 5 minutes more mummy
To snoozing off the alarm
From let's meet and plan
To let's plan and meet
From crying loudly
To sobbing silently
From i wanna grow up
To i wanna be in my fives again
We all grew up silently
Without even knowing

ମାଆ ନେଇଁ ବସିଲି
ଶୁଭର ଶୁଣି କି ସମ୍ପର୍କ
ମାଆ ବୋଲି ଦାକି ନେଇ
ପ୍ରତିପୁଣି ଲୋକନାଥ ଚତୁର୍ଦ୍ଦଶୀ ।
ତାହା ଗାଥା ସୁଧରା ପୁସ୍ତକ ପ୍ରଥମ ଆବେଶକ
ଦେଖାଯିବି ପ୍ରବୃତ୍ତିର କୋଣ
ନ ଭବିଷ୍ୟ ଆଜକୁ ମନର ସ୍ମରଣ
ଗୋରୁ ଶେ ଜାଣି ।
କିମି ସମ୍ବୋଧନ ବଢ଼ିଯାଏ ସେ
ଆଜକୁ ପ୍ରତି ଅଧିକ ଆଦରଣ ।
ମାଆ ଗର୍ଭି ହୁଇଯାଏ କି ଦିନ
ତାହା କ୍ଷମା ହାସଲ ହେ ସର୍ବ ପତ୍ନୀ ।
ନାଆର କୋଳ ଅଟଇ ବହୁ
ତାହା କଥାହେ ହୁଅଇ ସକ୍ତ ହୃଦୟ ହୁଅ ।
ସେହି ଚଳେ ଅଛି ହୁଇଯାଏ
କିମି ସ୍ୱାର୍ଥରେ ବାହ୍ୟାଫ ହୁଅ ।
କିମି ନ ଗାଧୁ ଆମକୁ ଶୃଙ୍ଖା
କେହି ଆଗରୁ ମାଆ ।
କିମି ହୃଦୟ ବାଧୁ ଆମକୁ ସ୍ୱାଧୀନ
ସେ ହିଁ ନୀଳର ମାଆ ।

Girls Anthem

**Don't wear that jeans
You are too fat to fit in..
Don't wear that tops
You are supposed to be girls,
Kurti and saree is meant for you beta
Never go beyond this data.**

**You need not go to school
For what you want to buy books,
Now wash the dirty kurtas,
Then come to learn how to make gol parathas.
She made herself fit in every vessel
Whichever the society chose..
Never refused or said 'no' to them,
As their love was her only castle..**

**Time came when the castle turned prison
She too knew the reason,
Depend on your father,
He'll drop you to the school.
Depend on your brother,
He'll drop you to the college.
Depend on your husband,
He'll drop you to the home.
Depend on your son,
He'll drop you to the heaven.**

**Girls can be tough as Everest ,
Girls can be mighty as Ganga..
Girls can be calm and sweet,
But if treated unfair can turn to Kali or Durga.
No time limits, no restrictions.
Girls are free from all LAKSHMANREKHAS!**

WONDERS OF SCIENCE

In the past, science was not so developed as it is today. People were solely dependent on the mercy of God. But, today the situation has got completely changed.

Now the wonders of science are visible everywhere. Our present Civilization may be caused a successive development of science. Science has removed superstitions. It has removed suffering. The development of science has made our life secured. In the past, people suffered from various fatal diseases. But now the development of medical science made diseases curable. There was a time when countless people died of "plague" and "cholera". They died uncared. These diseases were incurable then. But the situation has changed now lots of medicines and methods of treatment are available for various diseases. X-ray machine and other tools for better treatment is really a wonder of science. Science has played a remarkable role in the field of transport also. A few hundred years ago traveling was difficult task. People often traveled on foot or on the horse back. But today science has developed the fastest means of traveling. Motorbike, Car, Jeep, BOS Truck, Train, Ship, and Aeroplane have made traveling very easy and comfortable. All these are the gifts of science.

The invention of wireless, the radio, the telephone, the computer, and television has solved the problems of times and distance. Now the Journey to mars and the landing on the moon are possible due to the wonder of science, science has made cameras, watch, tanks, bombs, rockets, missiles, etc.

All these are wonders of science. Today life cannot be imagined without these things.

Current situations of Youngsters

Youth are the future of tomorrow. Every generation has its own struggles. Most of the youth today lies in low self-esteem, negativity, dependency, comparison, rigidity, and discontentment. However, it can sometimes be tough for one generation to relate to another. The main problem is the communication gap between them and their elders- the former believing themselves to be old enough for taking their own decisions for matters personal or social while the latter just refuse to hand over this responsibility to them. This leads to temperaments rising high more often. The most common problem face at this phase of life is peer pressure. Blame it on the way Indian societies are crafted on any other possible factor. The varying interest of the young adults and high expectation of the parents and relatives moils the spirit of growth as a whole. This acts as a check on the enthusiasm of the young mind leading to the waste of the time and resources. Therefore, the elders need to understand the youngsters, at the same time, children need to understand that parents care. There is no harm in learning from their experience and wisdom. The rise of technology has had a significant impact on the lives of young people. Technology can be an amazing tool, however, there are also concerns about how it impacts self-perception and privacy. If we took at the institutes today, privatization has increased the cost of education. Costly higher education in the private institutes and lack of basic amenities in the government aided educational groups has proven to be a big headache for our young people. The youth is considered to be the best asset of any country and investment in the human resource pro-miles flabbergasting returns. However, if we are to develop the citizens for better nation tommorrow, we are suppose to recognize the talent and counter the challenges Indian youth is facing in present day.
