ICT enabled tools

Information and Communication Technology (ICT) has become increasingly important in teaching and learning due to its ability to enhance the quality of education, increase access to educational resources and improve communication between educators and learners. As ICT in education advances informatization, not only teachers who support learning but also students will be able to acquire knowledge and skills of IT devices. Literacy will help students to select and use necessary information and to develop the ability to think for themselves. Thus, Department of Mathematics provides updated ICT resources for the students and the faculty members for better learning experiences.

Smart Board being used for class room teaching:
