**4th "International Conference on Advanced Computing and Intelligent Engineering",
(ICACE-2019)**

ICACE-2019 was organized by the department of Computer Science, Rama Devi Women's University (ICACIE 2019) on 21-23 December 2019. **A sum Rs. 1,00,000/- was contributed from the CURIE grant for the purpose.** The conference focused on theory and applications of advanced computing and intelligent engineering. ICACIE was a multidisciplinary conference organized with an objective of bringing together academicians, scientists, and researchers from industry, research scholars, and students working in all areas of advanced computing and intelligent engineering. The conference provided the authors and listeners with opportunities for national and international collaboration. Additionally, it also facilitated the networking among universities and institutions of India and abroad for promoting research and development. The aim of the conference was to boost the translation of basic research into applied investigation and convert applied investigation into practice. The conference provided the flavour of keynote lectures by eminent speakers from different areas and panel discussion by industry people. The scope of the conference included all areas of Advanced Computing and Intelligent Engineering. Proceedings of ICACIE 2019 were published by Advances in Intelligent Systems and Computing (AISC) series of Springer.

Glimpses from the 4th "International Conference on Advanced Computing and Intelligent Engineering", (ICACE-2019).
