#### **Report:**

With an overall aim and objective of keeping our surrounding clean and green with beauty, the ECO CLUB, RDWU heads forward to aware the people regarding our environment and its sustainable maintenance. Hence the Eco club has chosen the “World’s Ozone Day” as a platform to aware the people nearby regarding the knowledge of ozone layer and its protection as a priority. As a leading university of the state Rama Devi Women’s University has always led forward to convey the message to protect our mother earth under the patronage of our Honourable Vice-Chancellor, guidance of our chairman PG Council and effective coordination of the OIC, Eco Club and HOD of Department of Botany Dr. S.S Sardar, the observations of World’s Ozone Day has witnessed a majestic involvement of students to give it a great success.

A successful Walkathon was conducted on 16/09/2023 with the motto of Eco Club as “Nature Beauty is our Duty”. The rally started from Academic Block - I after getting the permission from Chairperson P G Council, Prof C C Rath. The rally was graced by the presence of Dr Sneha Das (Administrative Officer, UG ,RDWU), Dr S S sardar, OIC, Eco club and HOD ,Botany, Ms Iteshree Setty (Member Eco club), Dr S kanungo (Member Eco club), Dr M Das (Member Eco club), Ms Swati Rituparna (Member Eco club) and Dr Rebatika Maharana (Member Eco club). Our

esteemed CPGC was felicitated with sapling. He encouraged the participants and wished them a great success for the event.

The rally encompassed 80 number of participants showcasing their active enthusiasm to save their mother earth from all evils. The enthusiastic participants made a campus drive to spread awareness among people of our campus about the depletion of ozone layer and the measures to be taken to preserve it. They also propagated the theme of world ozone day,2023 highlighting the implementation of the Montreal Protocol and also counted the achievements of our government.

The commendable participation of the participant with enriched knowledge on ozone layer, ozone layer depletion, measures to be taken has been well appreciated every corner of the campus. The participant have communicated the message through various slogans, distributing pamphlets and roaming from department to department and successfully attracted the attention of people towards the ozone layer depletion and its protection. At the end of the event, they were provided with refreshments. They also exchanged their ideas of better protection and less production of HydroFluoroCarbon (HFCs).

At the end, the event witnessed a remarkable success.
